Synkisol Sustainability Report

OCTOBER NEWSLETTER

As we usher in the last quarter of 2025 we want to thank all our stakeholders: suppliers, clients and our partners for your support through the year. Staying true to our word we have engaged more with our customers through events, presentations, visits, promotions and social media engagements.

As we continue to strive to serve you better we welcome your feedback on how we can improve and serve you better.

● CUSTOMER SERVICE WEEK 2025

Synkisol has always been customer focused since its inception and was formed to respond to customer segments that were not met by the market. Therefore, customer service excellence is deeply engrained in our ethos and how we respond to our customers' needs.

● For this year's customer service week, we are going all out with promotions, discounts, events and other activities. Please check our website and social media platforms for more information.

COMPLETED PROJECTS

ATIS RESTAURANT- PARKLANDS

Synkisol has partnered with Atis since the inception of their first project on general waruinge road in Eastleigh in 2023 . The Confidence that Atis had in synkisol, enabled us to work together in their subsequent project, Atis 2 in Parklands. Synkisol was able to breath life in this new space by providing not only the concept designs, but also cutting edge fabrication work and high quality imported equipment to enable efficiency and increase productivity within the kitchen.

COMPLETED PROJECTS

CROWN PARADISE -SAGANA

At the heart of Sagana lies this hidden gem -Crown Paradise Hotel. Synkisol is proud to be part of the project supplying the central kitchen, bakery section, meat and vegetable preparation area, ventilation system and cold and dry storage areas.

ONGOING PROJECTS

ST. PATRICK'S MISSIONARY SOCIETY

KAREN

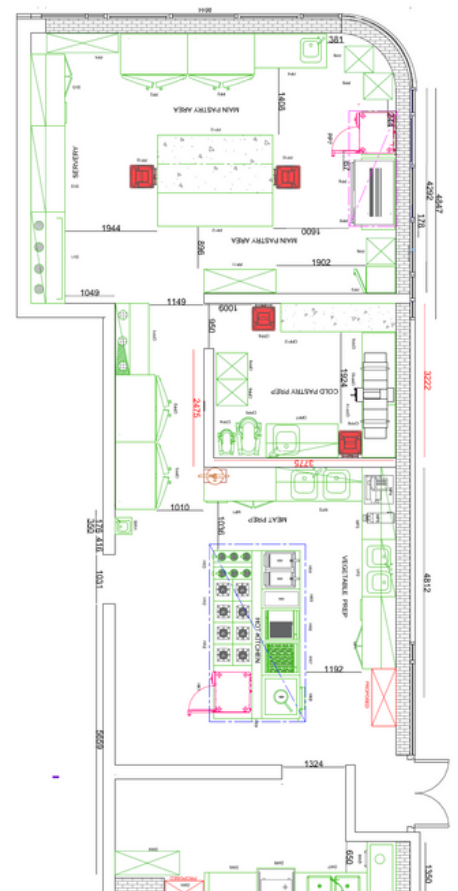

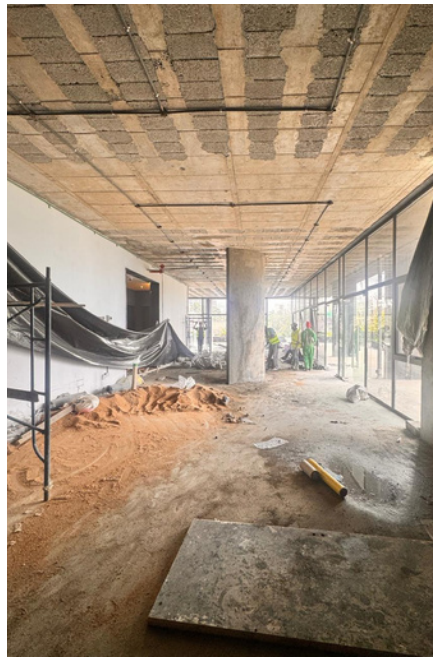

ONGOING PROJECTS

IZZI BRANCH & CAKE THE MANDRAKE

Westlands

Lookout for this magnificent upcoming project that will surely be the talk of town, and that is set to show case ambience elegance and bring out the wow factor in Nairobi's dining experience. Synkisol will work to ensure that the facilities supplied will enable the client and indeed diners to enjoy the final product.

OUTDOOR RESIDENTIAL KITCHEN

Do you have a new house, existing house or just constructing to sell? Having an outdoor kitchen not only adds value to your property, but also adds aesthetic and provides an alternative entertainment option for your family and guests.

You can order your custom-made outdoor kitchen tailored to your taste, preferences, space available, theme and much more .

Factors to Consider for Your Outdoor Kitchen Project

1. Construction Material

- Outdoor kitchens are designed with durable, weather-resistant materials suitable for outdoor cooking.
- In Kenya's diverse climate, materials must endure both strong sunlight and heavy rain.
- Stainless steel, especially AISI304, is ideal due to its anti-corrosion, heat resistance, and durability.
- These stainless-steel kitchens withstand all weather conditions—wind, rain, or heat—ensuring long-lasting performance year-round.

2. Equipment

You can order a cost effective custom-made outdoor kitchen design for an upcountry home or city outdoor recreation. These contain:

- **Grill** – a device for frying meat, fish, and vegetables over an open fire. If there is a shelf, it will be convenient to put dishes on it.
- **Jiko** – a structure in the form of a hearth designed for installing a cauldron. Equipped with convenient handles for carrying and stable legs.
- **Barbeque tables and outdoor tables** – durable metal surfaces that do not deform under high temperatures. You can place hot pots and pans on them.

3. Your Theme

Whether you prefer a countryside or modern look, our team works with you to bring your vision to life.

When setting up an outdoor kitchen, consider the following:

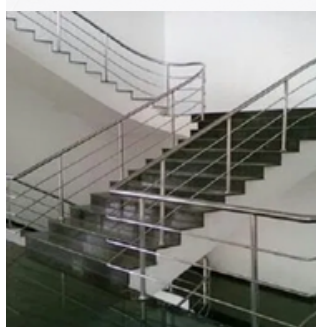

- **Location:** Place it near the house but away from toilets, septic tanks, and roads.
- **Safety:** Use stoves or grills to avoid fire risks from flammable materials.
- **Comfort:** Build under shade for a cooler cooking area.
- **Utilities:** Ensure access to water, drainage, and electricity.
- **Wind:** Position the stove so smoke doesn't blow into the dining area.
- **Design:** Choose between a standalone or attached layout—each has its benefits.

RAILING SYSTEMS

At Synkisol we believe railings are more than just structural elements—they're essential to creating safe, functional, and visually stunning spaces. Our stainless steel and glass railing systems are designed to meet our clients' rigorous code of standards while elevating the aesthetics of commercial and multifamily projects. With a focus on durability, precision engineering, and seamless installation,

Why Choose Synkisol for your railing project

- Synkisol works extensively with custom, decorative, design-driven products utilizing aluminum, stainless steel, and glass.
- Our service team designs and engineer's custom architectural railings and metal products for new construction and restoration projects.
- Our stainless-steel railing fittings and connectors are of many different kinds, and allow you to easily adapt your rail system to your layout. They are designed to accommodate alignment, enhance starting points, and bring consistent resolution at ending points throughout the installation process.
- Synkisol is a leading manufacturer and supplier of high-quality, innovative railing solutions and services.
- Synkisol provides a comprehensive suite of resources to support architects, contractors, and building professionals in designing and specifying railing systems with confidence.
- Our offerings include certificates and warranties to ensure the quality and durability of our products, detailed railing specifications tailored to meet project the requirements.
- We also provide powder coat specifications for premium finishes, CAD drawings to streamline the design process, and detailed product sheets showcasing our innovative railing systems. These resources are designed to simplify your workflow and help bring your vision to life with confidence and precision.
